

Comments from Moms about Juice Plus+®

The following are comments written by parents of children on CHS. The question was, "Have you seen any other changes in your child not covered by other questions in this questionnaire?" Their responses:

"Lexi eats much better and her "meltdowns" have become about 25% of what they once were. The severity of her "meltdowns" has also been reduced significantly. I have a child who not only smiles now, but actually jokes and laughs; a precious gift, if you ever spent any time with a child who has a very high functioning autism. What JP+ has given my family is immeasurable. I have recommended JP+ to a few others with children who have Aspergers and they are finding some of the same results."

"My 7 yr. old daughter has autism. She had many nights where she couldn't sleep and she had bad allergies, too. Both areas are much better. Amber was also a couch potato. Now, she has made friends in the neighborhood and plays outside! My daughter was asked by her 7 yr. old friend why she took JP+. Amber said, "To live..."

"I am crying as I write this: Jeff has had severe allergies and has been sickly since a little boy. He couldn't go outside and play with friends or enjoy a real life. Jeff is now on the school swim team and even placed second in their swim meet. Thank you JP+."

"My son has ADHD and has always had behavioral problems at school. I started seeing changes in him after a few months on JP+. After 2 years, he is now at grade level and enjoying school. So far, he hasn't even missed one day. He started taking JP+ at the end of last year and this year, we have seen him improve in academics."

"Conner seems happier – more up emotionally. He has laughed more in the last 6 months than his whole life. He also now has a dislike for certain foods like cheese, pasta, hotdogs."
